OVERALL HEALTH Starting from Intestinal Flora

There are more bacterial cells in your body than human cells.

Our gut microbiome is made up of trillions of bacteria, fungi and other microbes. While some bacteria are associated with disease, the gut microbiome plays an irreplaceable role in our health by helping to control digestion and boosting immune system. It is extremely important for many other aspects such as heart and weight.

The best microbiome therapy - **NuFinity SynPro®** helps in breaking down food, absorbing energy & nutrients from food. At the same time, act as immunity booster, effective for treating diarrhea, irritable bowel syndrome, allergic disorders, obesity, and even the common cold.

One of the most natural way to strengthen immune system with healthier digestive system and gut health.
