OPTIMAL D3+K2 ABSORPTION

Autoimmune disease: Rheumatoid arthritis, Systemic lupus erythematosus, Inflammatory bowel disease, Multiple sclerosis, Type 1 diabetes mellitus, Guillain-Barre syndrome, Chronic inflammatory demyelinating polyneuropathy, Psoriasis, Grave's disease, Hashimoto's thyroiditis, Myasthenia gravis, & Vasculitis.

Why we combine Vitamin **D3** & Vitamin **K2** ?

Vitamin D supplementation without vitamin K is less effective and might even be counterproductive. Followed by Covid-19 situation nowadays, severe vitamin D and K deficiency predicted hospitalization in infected patients.

Higher percentage of deficiency proved that not everyone can fulfill the recommended daily intake through natural way.

30 minutes of midday sunlight = 100% Vitamin **D3** per day

6 pastured egg yolk = 100% Vitamin **K2** per day

Vitamin K2 improves the function of vitamin D3 that activates the protein induced by them. This improves efficacy and may mitigate risks associated with high dose intake of Vitamin D3.
